OXARO

AWS PRACTICE / CANADIAN PUBLIC SECTOR

Secure cloud. Mission-ready innovation.

Odoo Implementation & Managed Services

Connect the work across your business.

YOUR PROGRAM. YOUR NEXT CAPABILITY.

Staff re-enter customer, project and purchasing information across separate tools, leaving inconsistent records and extra work.

What we deliver

01 / DELIVER

Plan your Odoo service

Optional fit assessment, edition and module selection, architecture and delivery planning.

02 / DELIVER

Connect your business work

Configure Odoo, integrate systems, migrate agreed records or upgrade your environment.

03 / DELIVER

Keep Odoo supported

Agree application support, maintenance, controlled changes and reporting in a service schedule.

What you receive

Connected applications

Configured modules and custom code.

A verified transition

Migration reconciliation and tests.

A ready operating team

Deployment, recovery instructions and training.

BUILT FOR HIGH-TRUST ENVIRONMENTS

Agree scope, acceptance and operating ownership with your team. Delivery includes documentation and a practical handover.

Community or Enterprise; agree modules and hosting. Managed coverage, routine changes and engineering allowances are scheduled. AI and added scope are separate.

Let's build your next mission capability.

aws-solutions@oxaro.com

Private offer / Scope and fees agreed in your quote.
AWS consumption and third-party licences are separate.
