OXARO

AWS PRACTICE / CANADIAN PUBLIC SECTOR

CLOUD • AI • MISSION SYSTEMS

Secure cloud. Mission-ready innovation.

OXARO helps Canadian public-sector organizations build, modernize and operate secure applications, data platforms and AI solutions on AWS.

What we deliver

Six practical ways to accelerate your cloud and AI outcomes.

ASSESS / TRANSFORM / OPERATE

From strategy to sustained service.

01 SECURE FOUNDATIONS

Protected B-Ready AWS Cloud

Governed landing zones, identity, networks, logging and cost controls — designed around the workload's security requirements.

02 APPLICATION DELIVERY

Cloud-Native Applications

Modernize legacy services and build new digital products with AWS-native architecture, automated delivery and DevSecOps.

03 GEN AI + AUTOMATION

Generative AI & Agents

Bedrock-based assistants, knowledge retrieval and workflow agents with bilingual experiences, controls and human oversight.

04 CONNECTED OPERATIONS

Data & Mission Integration

Connect systems and operational data through APIs, event streams and geospatial services for better situational awareness.

05 SECURE COLLABORATION

Integrated Work Environments

Cloud-hosted program workspaces and data rooms that enable controlled collaboration across organizations and suppliers.

06 ADVISORY + ACCELERATION

Cloud & AI Strategy

Assess readiness, prioritize use cases, design guardrails and roadmaps, and validate business value with focused pilots.

BUILT FOR HIGH-TRUST ENVIRONMENTS

CANADA-FOCUSED

Delivery shaped around public-sector priorities and procurement realities.

SECURITY-LED

Privacy, governance and operational assurance considered from day one.

END-TO-END

One team across discovery, engineering, integration and operations.

Let's build your next mission capability.

Start with a focused discovery conversation about your goals, security needs and delivery options.
